EXAMINER'S AMENDMENT

1. An ^{initialed} examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rhys Merrett on November 3, 1999.

2. The application has been amended as follows:
In claim 126, line 2, --]-- has been inserted after "118,".
In claim 131, line 2, --]-- has been inserted after "117,".

U.S. National Stage Application

3. Acknowledgment is made of the indication that the present application is filed under 35 U.S.C. 371. The required Forms PCT/DO/EO/903 and PCT/DO/EO/1390 are present in the application.

Art Unit: 2744

Information Disclosure Statement

4. The information disclosure statement filed August 19, 1999 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. (The foreign patents received do not correspond with the foreign patent numbers listed on the Form PTO-1449.)

Allowable Subject Matter

5. Claims 86-90, 92-112, 118-120, 122-155 (renumbered as 1-12, 14-42, 44, 47-54, 56-60, 13, 45, 61-63, 43, 46 and 55) are allowed over the prior art of record.

6. The following is an examiner's statement of reasons for allowance: The invention is drawn to a data entry system comprising a hand holdable data entry device. The data entry device includes a reading sensor a controller, a display comprised in a unitary assembly. The data entry device includes a rewritable storage programmable with information relating to a plurality of items which are usable selectable by the reading sensor. The data entry device includes a speaker and/or microphone which permits the data entry device to be used as a telephone handset. The data entry system further comprises telecommunication interface for telephonic transmission of information relating to a selected item or items from the storage to a remote processing center via a telecommunication network, a cellular telephone network or a satellite telecommunication

Art Unit: 2744

network for a telephonic reception of the information relating to the selectable items. The telecommunication interface can be represented by a telecommunications line for direct connection to the telecommunication network, or by an interface for connection to a wireless telecommunication network. The controller of the data entry device is arranged to respond to commands including commands which instructs the data entry device to commence downloading of information from the remote processing center as required for updating information previously stored in the rewritable storage. Lastly the data entry system further includes a carrier for a plurality of data and/or command codes for association with the display means of the data entry device, for displaying a plurality of selectable items. The carrier carries a plurality of codes, each for a respective one of a plurality of natural languages and/or numeric characters and a plurality of commands for controlling operation of the data entry system, each code being associated with a visual representation of the corresponding natural language or numeric character or command and/or of a graphical representation thereof.

The prior art of record does not teach or suggest the invention as described by the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
